

HIGH PERFORMANCE SPECIALTY CARRIER STARCH

FIBER-TAC® PLUS is specifically formulated for use by corrugators needing higher speeds and improved bond quality. **FIBER-TAC® PLUS** yields excellent bonding qualities while providing excellent shear resistance. This product allows for a higher percentage of the total starch solids cooked in the primary making more starch available for the initial bond, requiring less energy to gel the uncooked starch at the corrugator.

FIBER-TAC® PLUS has excellent tack, creating a bond that is very tolerant of machine variations through the bonding process. **FIBER-TAC® PLUS** can be run in high solids formulations when needed, but also has the ability to perform well in situations where lower solids are possible.

FIBER-TAC® PLUS is very economical, and can often reduce your adhesive costs versus other specialty carrier starches while improving performance. Typically requires 125 to 150 pounds per 330-gallon batch.

Benefits:

- Strong Green Bond
- Stable Viscosity
- Higher Run Speeds
- Reduction of Delamination
- Use with high or low solids formulations
- Very tolerant of machine variations
- Improved Board Quality
- Excellent Tack
- Works well on machines with edge bonding issues
- Reduce overall starch consumption
